

#### Capture Software FTP Server Configuration

Before capturing traffic, the Capture Software FTP Server must be configured:

- Navigate to the Program Files directory where Capture Pro Software is installed by default this will be C:\Program Files\Adobe\Capture Pro.
- Run the **CF-FTPServer.exe** program.
- The program must be setup via the **File-Configuration** menu as follows. When you first run the FTP Server program it will automatically start up with this configuration screen:

Option	Comment
FTP Site	FTP site to which the back images and index files should be transferred.
User name	User to connect to the site.
Password	User password for connection.
Port ID	The TCP port used by the FTP server to communicate. The default is "21" and is configurable.
Initial Folder	The subfolder from the root of the FTP site where the back files are stored.
