What's New in the Can You Raed Tihs?

Can You Raed Tihs? is a somewhat unusual application made to help you improve your reading skills by scrambling random text. It also gives you the possibility to enter your own content to scramble words, save text to file, as well as to unscramble words to make the content readable. Easy to set up and configure Setting it up takes little time, since there are no special options, third-party offers, or prerequisite software products included. No previous experience with text-based applications is required to be able to fully comprehend the capabilities of this program. When it comes to the interface, Can You Raed Tihs? has a single panel with a simple design and straightforward approach. It shows two boxes for entering and reading scrambled and unscrambled text, enabling you to type or paste contents. Scramble predefined or custom text A column with eleven buttons (all marked "Try Me") is displayed between these two boxes, and each corresponds to a built-in text that can be scrambled for as many times as you want by continuing to click on it. Furthermore, you can unscramble it to find out the original content. Save scrambled or unscrambled text to file It's also possible to save documentation to file by indicating not only the destination and file name, but also the.txt file extension, since the tool cannot automatically assign this format. If you leave it unchecked, it creates an unsupported file. In addition to these key features, the software utility integrates support for basic text options (undo, cut, copy, paste, delete, select all) as well as keyboard shortcuts. A help manual is included. Simple, yet practical tool for improving reading skills To wrap it up, Can You Raed Tihs? may not be particularly resourceful in its set of features, but it offers a decent solution for boosting your reading skills by attempting to read scrambled text. System resources usage was minimal in our tests. If you could improve the usability of this product, please contact us by email or click the 'Feedback' button.
