MultiLingual Soft Keyboards is an application that will make the language selection even easier. A large text area, where the selected language goes, is provided on screen, alongside a pop-up menu which lets you pick the one you want. However, as soon as you select one, the virtual keyboard for that language is activated, while the language selection pop-up appears to be replaced with a selection from the keyboard, and the text input field is changed to only accept keyboard input.
