### Edius 6.02 Serial Number

When I run the EDIUS installer it says "Error: System Error:#13001 System Error appears while EDIUS installation, uninstallation or update. How do I solve the problem?" in the "Installation Details" box The problem is that i have a win7 professional 32bit, and the first problem that i have with windows 7 is that windows automatically run some programs under the services list, and if i run the EDIUS 2.0 installer under windows 7, windows 8 or 10 then it automatically run the error ( #13001 ) and i can't launch the setup or uninstall the EDIUS 2.0 because of this windows errors ( system error #13001 ). So i decided to fix this problem, first i did it manually but i still have the same problem, so i check the windows task manager then i found that some services has problems and i couldn't start them then i deleted them from the windows services list and i run again the EDIUS 2.0 installer and the problem was fixed. So i decided to add the services manually to the windows services list but when i try to start them i still have the same problem ( #13001 System Error ). So if anyone has any ideas then please let me know. Thank you for your help. A: You probably meant: SELECT TOP 10 a.value, a.value as [Count] FROM e\_version a, e\_version\_usage b WHERE a.ID = b.updater\_id AND a.name = b.name AND a.type = 'INSTALLATION' AND ( b.name IS NOT NULL OR b.updater\_id IS NOT NULL OR b.updater\_id IS NOT NULL ) ORDER BY COUNT Note the missing parentheses on the WHERE clause. You can also simplify your query to: SELECT TOP 10 a.value, a.value as [Count] FROM e\_version a
