S7-1200 PLC Programming and Control Software Version. PLC Software.1999-2003: Dr. Egawa is a senior researcher at the Institute of Biomedical Science, RIKEN, Japan. His research interests are in the development of cell based immunotherapy for breast cancer and other cancers including glioblastoma. He has also been working on the development of genetic therapy using retroviral vector to transfer genes into breast tumor stem cells and directing these tumor stem cells to differentiate to normal cells using a molecule called Notch. He has also found that the receptor for Notch has the ability to suppress metastasis of breast cancer. Dr. Egawa has also been studying the nature of breast cancer stem cells and their role in breast cancer metastasis. He has developed a humanized mouse model that is able to study breast cancer metastasis in vivo. His work on the migration of breast cancer stem cells has lead to the identification of a molecule called alpha4 integrin that regulates the differentiation of breast cancer stem cells and its possible use as a target for breast cancer therapy. Dr. Egawa
