! Keyboard is the one I use with logon details in the Avira program. It works excellent and records all the logon details, including keys pressed. I'm a member of the FF board and a Tech Support person. I think it's safe to say, we're both legit. Click to expand... If that is your only use for it, why do you use Avira? Many viruses don't even know how to delete a logon keylogger. I use it to kill the time as it's a good excuse to have nothing to do for a couple of minutes when I get home. I would put it under my desk to monitor logons as I know there is a rare chance someone will type their password as they log on and leave the room. I'm talking once or twice per month. On some forums, FF/FW has come out with this crack, and is charging for the crack, when the crack was included in the application for free. The crack is available here, and some forum users do not know how to crack a copy that is not cracked by FF/FW. Go to the Crack Thread, and read the Rules and Guidelines. Download the crack, which will bring up the 3-screen crack, with options. To some, the crack means that the crack is cracked by a crack site, and as there are not many cracking sites around anymore, it is like any other cracking site. Any other crack that has been posted, will include instructions on how to crack the copy. I have no problem with a crack as long as the person who cracked it, didn't charge for it.
