Search Belated discovery of this concept, one that I actually first wrote about in January of this year. I had no idea that we would see an official release for this from the Evil Empire®. The only muckety-mucks who knew about it are the folks who have been diligently working on those holes in the crust in the Hudson Valley – and is it any wonder why the holes keep appearing when the crust is that thin? In my previous post, I said that this was among the most promising things we have seen in a long time for the Hudson Valley. Well, in the last year, we’ve seen some seriously cracking good tidbits that really do show just how much potential this region has for a nice, long term future – and that includes a dearth of good, cheap real estate that has meant a concentration of “more of the same.” But this is more than that.
